Re: Price increase and subsequent discontinuation of the Positioner Option in AM and AMExC Controls

Dear Madam or Sir,

AUMA Actuators, Inc. has successfully provided the AM and AMExC Controls for a number of years for open / close applications as well as for those requiring a control or positioning signal via a 4 to 20 mA input to the actuator.

Like the AM Controls for bus systems these 4 to 20 mA positioning combinations have now reached a point where more cost effective solutions are available.

Effective **February 1st, 2018** AUMA USA will increase the price adder for a positioner with AM and AMExC Controls by \$150.00.

Part Number	Old Price	New Price
41.10 Positioner	\$295.00	\$445.00

Effective **July 1st, 2018** AUMA USA will no longer accept orders for actuators for the AM and AMExC Controls with the positioner option.

For open / close applications the AM, AMExC, AC 01.2 or ACExC 01.2 will remain viable products.

The AC 01.2 and ACExC 01.2 will be available for applications requiring a control or positioning signal via a 4-20 mA signal.

The provision of spare parts will be available for 10 years after this discontinuation date. Irrespective of this date, possible warranty claims will be processed in accordance with our current procedures.

Should you have any questions, please do not hesitate to contact your Regional Sales Manager or Inside Sales contact.

Best regards

AUMA Actuators, Inc.
