AUMA actuators with DeviceNet interface

DeviceNet is a simple but powerful **fieldbus system** which is promoted by process control system manufacturers in **North America**.

With **2.5 million installed DeviceNet devices**, it has gained a considerable share of the international market. AUMA multi-turn, part-turn and linear actuators are available with the DeviceNet interface. For the past 5 years, actuators with **AUMA Matic Triple Play** controls have been furnished with the DeviceNet interface to a wide range of industrial plants. Now the **AUMATIC** microprocessor based actuator controls are available with the DeviceNet interface.

Both versions have undergone and **successfully completed** the required extensive **certification tests** by the ODVA (Open DeviceNet Vendor Association).
